

Inspiration for a Bridal Shower

PHOTO SHOOT

by Michelle Moffitt, Honey & Bee
photos by Twins Media

The assignment to design a bridal shower on the water inspired the look of tropical summer and the use of vibrant summer color. The industrial feel of the ship channel location as well as the steel structure of the Harbor Bridge in the background bespoke a modern, clean-lined look, thus the incorporation of acrylic chairs, acrylic champagne bucket, clear glass plates, and fruit bowls, and the desire to stay cool, light and airy despite the semi-tropical air of the ship channel. The thought of a summer shower celebrating a bride led to fun, feminine colors of green, pink, and coral, which resulted in the use of tropical foliage, incorporation of corals and greens in the floral arrangements and, of course, the pink flamingos! In a harbor filled with seagulls, why not step outside the box and let your inner and fun-loving flamingo be seen at a tropical shower celebrating that special bride-to-be...
